Assignment 7.5 - Solution

Flexbox Mini-Project: Responsive Landing Page

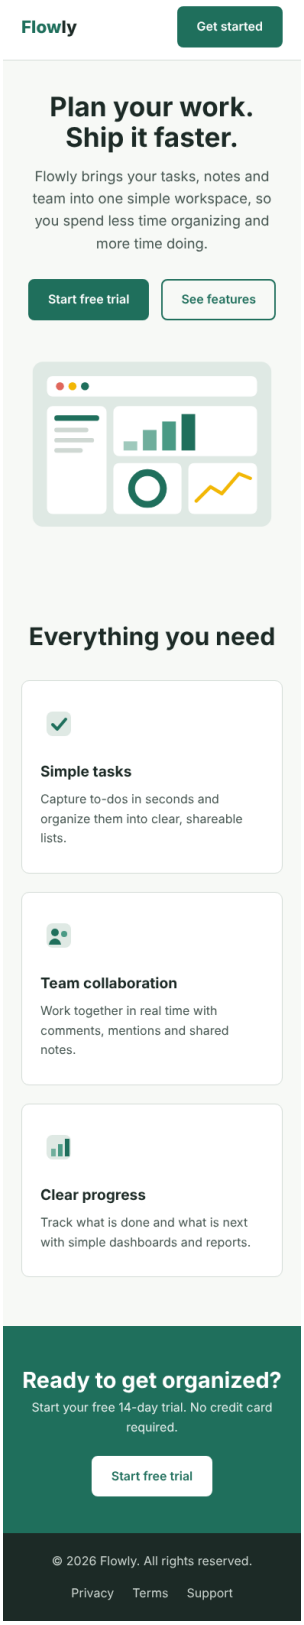

Desktop (1280px)

Tablet (768px)

Mobile (390px)

How the requirements are met

Required sections

Navigation bar, hero, 3 feature cards, call-to-action section and footer are all in **index.html**.

1. Flexbox in navbar and hero

.nav is a flex row with **justify-content: space-between** and **align-items: center**. **.hero** is a flex container with the text and image as two flex items.

2. Responsive feature row

.cards uses **flex-wrap: wrap** and each **.card** has **flex: 1 1 260px**: 3 per row on desktop, wrapping to 2 or 1 as the screen narrows.

3. gap, justify-content, align-items, flex-wrap

All four are used: **gap** for spacing, **justify-content** in the navbar, cards, CTA and footer, **align-items** in the navbar, hero and cards, and **flex-wrap** in the hero, cards, CTA and footer.

4. Consistent colors, type, spacing

CSS variables in **:root** (colors, radius, spacing scale) are reused everywhere, with a single font family throughout.

5. No overflow on small screens

Wrapping flex containers, **max-width: 100%** on SVGs, and a media query at 800px. Tested at 320px with no horizontal scroll.

index.html

```
